EDUCATION

University of Northern Iowa

Bachelor of Science in Computer Science, Minor in Data Science

Cedar Falls, IA

August 2025 – Present

Kirkwood Community College

Associate of Science

Cedar Rapids, IA

August 2023 – May 2025

EXPERIENCE

Data and Operations Intern

June 2026 – Present

Prairie Lakes Church

Cedar Falls, IA

- Managed digital content and mobile resources in Rock RMS, a church-focused CRM platform, supporting audience engagement across web and mobile experiences
- Led staff-wide adoption of Otter.ai and developed a ClickUp Super Agent that converts meeting transcripts into structured notes and assigns tasks, saving staff multiple hours of manual work each week
- Improved organic search visibility by 16.11% and average keyword position by 31.75 places through technical and content SEO initiatives
- Added searchable transcripts for every sermon published since mid-2022, improving website accessibility, content discoverability, and long-term search performance
- Built a family ministry resource page within the church's mobile app, implementing custom filtering to help users quickly find relevant materials
- Implemented UTM campaign tracking to improve digital marketing attribution and shared the solution with the Rock Community for use by other organizations
- Developed a Verse of the Day page for the church's mobile app, integrating Bible.API to retrieve and display daily scripture content

PROJECTS

AI-Powered Fragrance Finder | *Python, JavaScript, Hugging Face, FastAPI* September 2025 – January 2026

- Created a full-stack AI-powered fragrance recommendation system serving 24,000+ fragrances with 3 search modes (similarity-based, accord (scent) filtering, and random discovery)
- Engineered a FastAPI backend with semantic search using Hugging Face Sentence Transformers, achieving instant similarity matching through precomputed 384-dimensional embeddings
- Preprocessed and cleaned a Kaggle fragrance dataset, handling missing data and creating structured JSON representations

Interactive Baseball Stat Application | *SQL, Python, JavaScript, HTML, CSS* July 2025 – January 2026

- Built a full-stack web application for viewing team and player baseball stats, integrating a Flask (Python) backend with a self-designed postgres database serving data to a responsive HTML/CSS/JavaScript frontend
- Combined the Lahman Baseball database with additional datasets into a unified postgres schema hosted on Supabase
- Leveraged SQLAlchemy within Flask routes to execute database queries, filter data, and format results for frontend display
- Developed a dynamic frontend that fetched and rendered database results using asynchronous JavaScript (Fetch), enabling interactive exploration of baseball statistics
- Deployed the application on Render, providing a live platform for users to access and analyze baseball data

Chromium Translator Extension | *HTML, CSS, JavaScript, Deep Translate API* June 2025 – August 2025

- Developed a Chromium extension using HTML, CSS, and JavaScript to provide seamless in-browser language translation
- Integrated the Deep Translate API to perform real-time translation asynchronously

TECHNICAL SKILLS

Languages: JavaScript, Java, Python, Liquid/Lava, C/C++, SQL, R, Racket, HTML, CSS

Frameworks / Libraries: Vue.js, Node.js, Flask, SQLAlchemy, Pandas, FastAPI, NumPy, Hugging Face, Jest

Developer Tools / Hosting: Rock RMS, VS Code, GitHub, Semrush, BlueJ, RStudio, Kaggle, Excel, Render, Supabase, Cloudflare
